Department:	Medical Management	Policy Number: UM 02
Subsection:	Concurrent Review	Effective Date: 04/01/2015
Applies to:	Medicaid Health Plans Internal Policy	

PURPOSE:

The purpose of this policy is to define Maryland Care, Inc., dba Maryland Physicians Care (MPC's) business standards for the use of administrative days.

OBJECTIVE:

The objective of this policy is to determine the use of administrative days during an inpatient admission if applicable.

To be paid for administrative days, the provider shall document in the Medical Record:

The member no longer needs acute care, and the following conditions are met:

- The provider has implemented a pre-discharge plan and initiated placement activities for the member
- A plan for discharge during the period of administrative days, the provider is actively pursuing placement at an appropriate level of care for the member, and has documented the activity in the member's record
- The provider has received the determination from MPC that the member no longer needs the level of care for which the hospital is licensed to provide
- The provider has received a determination from MPC that the member requires the level of care provided by a pediatric specialty hospital, nursing facility, or a chronic level of care facility.
- The provider has notified MPC's Utilization Management (UM) department of the pre-discharge planning before the termination of the need for inpatient hospitalization at the level the facility is licensed and certified to provide
- The hospital has submitted documentation to MPC's UM department that placement activity is conducted, at least 2-3 referrals, on each workday for which payment is requested for administrative days.

The use of administrative days applies to discharge planning for medically necessary care at a lower level, i.e.: skilled nursing facility and a bed is not available. This excludes social causes for a delay in discharge planning including but not limited to Child Protective Services (CPS) holds and guardianship.
