

PA.213.MPC Platelet Rich Plasma

*Maryland Physicians Care considers Platelet Rich Plasma for the treatment of osteoarthritis (e.g. hip, knee, and temporomandibular joint (TMJ)), chronic wounds, hamstring injury, ankle sprain, or any other application to be **experimental and investigational**.*

Maryland Physicians Care does not provide coverage for experimental or investigational services and procedures.

Background

According to the American Academy of Orthopedic Surgeons, platelet rich plasma (PRP) is plasma with a higher concentration of platelets than is what typically found in blood. To achieve PRP, blood must initially be drawn from the individual and further separated into platelets and other blood cells through centrifugation.

Connective tissues have limited blood circulation, inhibiting quick recovery of wear and tear post repetitive injury. As damage accumulates within tissue, the acute healing pathways may not be triggered due to lack of acute insult. By activating acute healing pathways, physicians speculate a quicker recovery of injury site. PRP may be injected into the site of inflamed tissue to stimulate an acute injury and induce an acute healing response. PRP may also be used to improve healing after surgery for certain injuries by stitching the treatment into torn tissues.

Currently, there is insufficient evidence to support the coverage of PRP for any indications.

CPT Codes Not Covered for Indications Above

Code	Description
*0232T	Injection(s), platelet rich plasma, any site, including image guidance, harvesting and preparation when performed *This procedure code is not a covered benefit under Maryland Physicians Care.
0489T	Autologous adipose-hyphen derived regenerative cell therapy for scleroderma in the hands; adipose tissue harvesting, isolation and preparation of harvested cells including incubation with cell dissociation

PA.213.MPC Platelet-Rich Plasma (PRP)

Policy Number: PA.213.MPC

Last Review Date: 08/15/2024

Effective Date: 09/01/2024

	enzymes, removal of non-hyphen viable cells and debris, determination of concentration and dilution of regenerative cells
0490T	Multiple injections in one or both hands
0481T	Injection(s), autologous white blood cell concentrate (autologous protein solution), any site, including image guidance, harvesting and preparation, when performed
86999	Unlisted transfusion medicine procedure

HCPCS Codes Not Covered

Code	Description
G0460	Autologous platelet rich plasma (PRP) or other blood-derived product for nondiabetic chronic wounds/ulcers (includes, as applicable: administration, dressings, phlebotomy, centrifugation or mixing, and all other preparatory procedures, per treatment)
G0465	Autologous platelet rich plasma (PRP) or other blood-derived product for diabetic chronic wounds/ulcers, using an FDA-cleared device for this indication, (includes, as applicable: administration, dressings, phlebotomy, centrifugation or mixing, and all other preparatory procedures, per treatment)
P9020	Platelet rich plasma, each unit
S9055	Procuren or other growth factor preparation to promote wound healing
